Wi-Fi RF Path: this RF path extracts the 2.4 GHz Wi-Fi signal from the HF coaxial cable while rejecting the HF signal by more than 120 dB. It operates as a duplexer.
At the local site, near the radio or amplifier, an RF combiner/duplexer combines the HF and 2.4 GHz Wi-Fi signals onto the same coaxial cable.

I²C bus reader, Wi-Fi web server, and 128 × 32 OLED display mirror
